Flight Levels Systems Architecture

A Flight Level Academy Certification

Birgit Mallow

has completed the 2-day (16h) training workshop Flight Levels Systems Architecture.

Participants learn how to manage business agility across the entire organization and avoid local suboptimization of teams by applying the Flight Levels Model in the context of their company. Participants practice and become proficient in learning which work systems (boards) need development, how to connect them, how to coordinate work across the different flight levels, and which agile interactions are required for the company to be agile in the market by achieving true business agility.
